

SYMH Post 16 & KS5 Update

July 2018

I promised that the June edition would be my last Post 16 newsletter but I've had a free summer school for girls going into Y13 who want to do maths at top universities brought to my attention. <https://www.murrayedwards.cam.ac.uk/step-summer-school> Apparently it's not received many applications from northern girls so far, so please consider passing this information on to appropriately placed students.

*This then gives me one last chance to remind you of opportunities and events taking place in the remainder of this term, please do consider taking part
Have a great summer*

Cheers

Pete

Contents

New to teaching A level (4th July)

Technology in the classroom (16th July)

Local Network meetings

Summer school for teachers (20th -23rd Aug)

New to teaching A level

Wed 4th July 1pm – 4 pm : Sir Thomas Wharton Academy

Led by FMSP's Kieren O'Sullivan, this workshop will focus on strategies for getting to grips with an AS class as a new to A level teacher.

To participate in this FREE workshop email Tara at admin@symathsub.org.uk

Technology & Statistics (GCSE/ A level)

Monday 16th July Adwick IOE 1pm – 4pm

This local workshop will focus on developing strategies and resources to support teachers at GCSE and beyond to incorporate the use of technology into their statistics lessons. In particular the use of Excel & Geogebra as statistical analysis tools will be investigated.

To participate in this FREE workshop please email admin@symathsub.org.uk

Network Meetings

A level & Further Maths

The remaining summer meetings will be as follows

Tuesday 3rd July: Notre Dame, Sheffield: focus **Statistics**

Wednesday 4th July: Adwick, Doncaster: focus **Mechanics**

For further details contact

Kieren O'Sullivan (Statistics) at KOullivan@notredame-high.co.uk OR

Rolf Hayes (Mechanics) at HayesR3@schoolpartnershiptrustorg.onmicrosoft.com

STEM Centre Summer school (20th – 23rd August)

Our highly acclaimed annual four day summer school, run in conjunction with MEI and the University of Sheffield, is designed for teachers who have little, or no, experience of teaching A level mathematics.

Develop pedagogical knowledge in order to improve teaching skills, thus giving the confidence to teach for understanding and engagement, rather than 'teaching to the test'. Designed for teachers who are new to teaching, eg. have no more than three years teaching experience or more experienced teachers of mathematics who are new to teaching A level.

For full details follow the link below, this programme is eligible for Enthuse Award which allows your school to claim a full reimbursement of the course costs.
